

I am Dave Stanley, a dentist in St. Albans and a resident of Fairfax and see the Georgia Wind turbines daily and love the fact that they are producing clean power. I kayak in Arrowhead Lake and the Lamoille River 15 times per year and can attest you cannot hear any noise. We need more projects like this. If you travel outside Vt you will see thousands of them across the US which are reducing our dependence on dirty fossil fuels. I have many opportunities to talk to patients about the subject and I would think 80% are very vocal in their support of wind energy. One thinks if we scaled up to 30 similar projects we would replace the lost power generation from Vt Yankee. I support nuclear power in general but would like to have seen Vt Yankee refitted to a more modern safer design.

Thanks for approving this project and I hope many others in the future will be built.

My work schedule and the fact that my daughter is getting married Saturday May 17th precludes my coming to Morrisville Tuesday 5/13 to personally testify in support of the wind turbines.

thanks, Dave Stanley
