Subject: Comments on the sound standard for wind turbines

Dear Vermont Public Service Board Members, Much has been said and debated about the sound emitting from wind towers and how it effects human health. We would wish that this is addressed as scientifically accurate and you would favor a lower sound standard of no higher than 30/35 DBA max for interior and exterior sound. Please listen to your fellow Vermonters and help us enjoy our great state in peace. Thank you for your service, Gary and Deborah Wright 3400 Ethan Allen Hwy St. Albans, Vt. (Georgia) wright family farm [wright family farm 37@gmail.com](mailto:wrightfamilyfarm37@gmail.com)
