

Rule 5.500 Application for Interconnection of Distributed Energy Resources Not Greater than 150 kW

This form may be made available in an electronically fillable format and it is permissible to submit the form with electronic signatures.

Preamble and Instructions:

An owner of a distributed energy resource who requests interconnection to a State-regulated distribution or transmission facility must submit an application to the Interconnecting Utility. An application is accepted as complete when it provides all applicable information required.

1. Applicant:

Name: _____

Address [eSITE ID]: _____

City: _____ State: _____ Zip: _____

Telephone (Day): _____ (Alternate): _____

Email: _____

Utility Consumption Meter Number (if applicable): _____

Name of Utility: _____

Representative: (e.g., System installation Contractor or coordinating company, if appropriate)

Name: _____

Address: _____

City: _____ State: _____ Zip: _____

Telephone (Day): _____ (Alternate): _____

Email: _____

Will the Generation Resource be used for any of the following? Check all that apply

Net-Metering? Yes No

Group Net-Metering? (If yes, please provide group information directly to your utility) Yes No

Non-Exporting? Yes No

To participate in the Standard Offer Program? Yes No

Participate in the wholesale electricity market? Yes No

Qualifying Facility¹ where 100% of output will be sold to Interconnecting Utility? Yes No

Qualifying Facility¹ intending to sell power at wholesale to
an entity other than Interconnecting Utility? Yes No

Other (describe): _____

For an energy storage system, check the mode of operation below: (Check all that apply)

Peak Shaving Retail Demand Management

Emergency/Back-up Frequency Regulation

Wholesale market participation(describe) _____

Other (describe) _____

¹ Evidence of FERC QF Certification will be required prior to commercial operation

2. Project Specifications:

All power ratings should be listed in AC throughout unless otherwise noted

Physical Address [eSITE ID] : Same as above

City: _____ State: _____ Zip: _____

Is this an amendment to an existing system? Check One: Yes No

If YES, what is existing CPG# _____

Please describe the proposed amendment: _____

Energy Source: Check all that apply

Solar Wind Hydro

Energy Storage Other: _____

Interconnection Configuration? Check One

Generation Meter Behind Consumption Meter

Total number of inverters to be interconnected pursuant to this Application: _____

Total Aggregate Nameplate Rating for all generators (kW): _____

Total Generating Export Capacity² Requested (kW): _____

Individual Generator Data:

Provide for each Generator, use additional sheets if needed.

Type of Generator: Check One:

DC Generator or Solar (Inverter) Synchronous Induction Other _____

If SYNCHRONOUS or INDUCTION generator (rotating machine), fill out Generator Technical Information in "Application for Interconnection of Distributed Energy Resources greater than 150 kW"

Photovoltaic (PV) Data

Panel Manufacturer _____ Model _____

Quantity of PV panels _____ Power Rating per panel (DC Watts) _____

Total Power Rating (DC Watts) _____

Roof Mount

Ground Mount

Other

System Orientation: fixed mount 1-axis tracking 2-axis tracking

² As limited by any export controls

PV Individual Inverter Data :

Provide for each inverter, use additional sheets if needed.

Inverter Manufacturer: _____

Model Name & Number: _____

Version Number: _____

Nameplate Rating: (kW)_____ (kVA)_____ (AC Volts)_____

If Power Factor not Unity:

Rated Power Factor: (Underexcited)_____ (Overexcited)_____

Minimum Power Factor: (Underexcited)_____ (Overexcited)_____

Single phase Three phase (Check one)

Do export controls apply to this inverter? (Check one) Yes No

- Is the inverter UL 1741 / IEEE 1547.1 Compliant?
Yes No
- Is the inverter certified per UL 1741-SA and compliant with ISO-NE’s Inverter Source Requirements Document (ISO-NE SRD)?
Yes No
- Is the inverter certified per UL 1741-SB and compliant with ISO-NE’s Default IEEE 1547-2018 Setting Requirements?
Yes No

If Yes to any of above bullets, include documentation provided by the inverter manufacturer describing the inverter’s UL 1741/IEEE 1547.1 listing.

Battery Storage/Backup Information

Is this Battery an add-on to an existing customer-generator facility? Yes No

If Yes, existing CPG #: _____

Is this Battery: Battery (DC Coupled – No Export) + Solar Yes No

 Battery (AC Coupled - Export) + Solar Yes No

 Battery Only (AC Coupled - Export) Yes No

 Battery Only (AC Coupled – No Export) Yes No

Will the battery share an inverter with a Renewable Energy system? Yes No

If Yes, can the battery be charged from the Electric Utility electric distribution grid? Yes No

If No, how is the battery Energy Storage System prevented from being charged by the electric distribution system? _____

Shared Inverter Information (DC coupled inverters with multiple sources)

Quantity: _____

Battery System Manufacturer: _____ Model: _____ Battery Type: _____

Battery Charge/Discharge Rating (kW AC): _____ Battery Energy Capacity (kWh): _____

PF Setting: _____ DC Source/Prime Mover: _____

Do export controls apply to this inverter? (Check one) Yes No

- Is the inverter UL 1741 / IEEE 1547.1 Compliant?
Yes No
- Is the inverter certified per UL 1741-SA and compliant with ISO-NE's Inverter Source Requirements Document (ISO-NE SRD)?
Yes No
- Is the inverter certified per UL 1741-SB and compliant with ISO-NE's Default IEEE 1547-2018 Setting Requirements?
Yes No

If Yes to any of above bullets, include documentation provided by the inverter manufacturer describing the inverter's UL 1741/IEEE 1547.1 listing.

Dedicated Inverter Information (inverters with only batteries for DC source)

Quantity: _____

Battery System Manufacturer: _____ Model: _____ Battery Type: _____

Battery Charge/Discharge Rating (kW AC): _____ Battery Energy Capacity (kWh): _____

PF Setting: _____ DC Source/Prime Mover: _____

Do export controls apply to this inverter? (Check one) Yes No

- Is the inverter UL 1741 / IEEE 1547.1 Compliant?
Yes No
- Is the inverter certified per UL 1741-SA and compliant with ISO-NE's Inverter Source Requirements Document (ISO-NE SRD)?
Yes No
- Is the inverter certified per UL 1741-SB and compliant with ISO-NE's Default IEEE 1547-2018 Setting Requirements?
Yes No

If Yes to any of above bullets, include documentation provided by the inverter manufacturer describing the inverter's UL 1741/IEEE 1547.1 listing.

Battery Intended Use and Operation

Please provide a sequence of operations explaining how the system will operate under normal and off-grid conditions (explain how the battery will disconnect and reconnect to the grid). Please provide the type of switching and indicate if it is self-contained or utilizes separate components. An example would be self-contained device with DC to AC inverter, battery charger, and integrated AC transfer switch. On your one-line diagram please label the various equipment (inverter(s), charge controllers, switches, etc.) so that your written operational equipment discussion matches the one-line diagram. If your system rated kW outflow to the grid is restricted by control logic (outflow kW is less than inverter total capacity), then indicate the worst case outflow capacity.

Limited-Export / Non-Export / Limited-Import Data:

If multiple export control systems are used, provide for each control system and use additional sheets if needed.

Is export controlled to less than the Total Aggregate Nameplate Rating? Yes No

Method of export limitation:

- Power Control System Reverse Power Protection
 Minimum Power Protection Other (describe): _____

Export controls are applied to how many generators? Multiple One

If Power Control System is used, open loop response time: _____(s)

Power Control System output limit setting: (kW) _____(kVA) _____

Energy Storage System Power Control System operating mode:

- Unrestricted Export Only Import Only No Exchange

Describe which Generators the export control system controls: _____

3. Applicant Signature (may be electronic)

I hereby certify that, to the best of my knowledge, all the information provided in this Interconnection Application is true and correct.

Signed: _____

Title: _____

Date: _____

Operation is contingent on Utility approval to interconnect the Project and receipt of all other required regulatory approvals.
